

AG8100

The AG8100 multifunctional system brings seed and fertilizer monitoring together on a single screen. Practicality and efficiency in planting.

Description

The AG8100 Monitor was developed to make work in the field even easier. It can be installed on all types of planters, the AG8100 works as an interface so that the operator, using only one screen, can control all planting operations with high precision.

Benefits:

- Planting monitor with grain counting
- Average count and per line
- Planting speed and area planted
- Automatic recognition of the connected implement
- Monitors up to 120 rows, 60 for seed and 60 for fertilizer
- Easy-to-interpret touchscreen
- Colored graphs of line count status
